

Speak Up™

or Medication

caution

Medication safety is a team effort. You, your doctor, pharmacist, and other caregivers all have a role in making sure you get the right medication, take the correct dosage, and avoid bad reactions. It's important to know what questions to ask about a new medication and to Speak Up if something doesn't sound right.

Your medication list is your first responsibility

Making sure you have an accurate medication list is your responsibility. Carry it with you, and share it with your doctor, pharmacist, and other caregivers.
