A T V

The use of telehealth — also called virtual health services — is growing in popularity. Whether a telehealth visit takes place over the telephone or by video conference, telehealth is changing the way you can reach your doctor and other healthcare providers.

Telehealth has many benefits. It saves travel time and transportation costs, increases access to specialists and for second opinions, and can take place almost anywhere you can have a private conversation — either in the comfort of your home or a safe place.

Speak Up™ materials are intended for the public and have been put into a simplified (i.e., easy-to-read) format to reach a wider audience. They are not meant to be comprehensive statements of standards interpretation or other accreditation requirements, nor are they intended to represent evidence-based clinical practices or clinical practice guidelines. Thus, care should be exercised in using the content of Speak Up™ materials. Speak Up™ materials are available to all health care organizations; their use does not indicate that an organization is accredited by The Joint Commission.
