

1. Clean your hands ...

- Use an alcohol-based hand sanitizer.
- Use soap and water if your hands are visibly dirty.
- Clean your hands before eating or touching food.

2. Remind caregivers to clean their hands ...

- As soon as they enter the room.
- This helps prevent the spread of germs.
- Your caregivers may wear gloves for their own protection.

. Stay away from others when you are sick ...

- If possible, stay home.
- Don't share drinks or eating utensils.
- Don't touch others or shake hands.
- Don't visit newborns.

. If you are coughing or sneezing ...

- Cover your mouth and nose.
 - Use a tissue or the crook of your elbow.
 - Clean your hands as soon as possible after you cough or sneeze.
-
- Keep a distance of about 6 feet between you and others.

. If you visit a hospital patient ...

- Clean your hands when entering or exiting the hospital.
- Clean your hands before going in or out of the patient's room.
- Read and follow the directions on signs posted outside the patient's room.
- You may be asked to put on a mask, gloves, a paper gown, and shoe covers.
- If sanitizer wipes are in the room, read the instructions. Some wipes are only for cleaning equipment and surfaces, and are not safe for skin.
- If you are unsure about what to do, ask the nurse.

. Get shots to avoid disease ...

- Make sure your vaccinations are current — even for adults.
